

Hon Vicky Darling MP Minister of Environment and Resource Management.

RE: SUSTAINABILITY OF THE FRASER ISLAND DINGO.

Australia has the worst record in the world for species extinction, and it seems the Queensland Government is intent on continuing this unenviable record.

The Dingo (*Canis lupus dingo*) has scientifically been proven to be one of the oldest breeds in the world. It is listed as Vulnerable by the IUCN (International Union for Conservation of Nature), which means it is facing a high risk of extinction in the wild. The Dingoes of World Heritage listed Fraser Island are also one of the purist strains in Australia and are a major attraction for International tourists.

Against this evidence and the evidence of independent, non-governmental experts, the Queensland government, under the guise of protecting the public from aggressive animals, has adopted a policy of systematic shooting, hazing (the shooting of clay pellets from slingshots) and starvation in an attempt to exterminate the animals, and they have appointed Qld. National Parks (DERM) as their executioners.

Dingoes left alone are generally timid by nature, but is it any wonder that all this interference is causing extreme stress making them more likely to be aggressive towards humans! And is it any wonder that normal, compassionate people, when they see a starving animal, are tempted to feed it!

There is no doubt that the Departments Dingo Management Strategy is a complete failure and there are important questions that need answering...

1.

Why are unqualified personnel given carte blanche to shoot Dingoes they perceive as dangerous when animal behaviourists contradict their assessments?

2.

Why will DERM not co-operate with these experts in finding a workable management program?

3.

Why are those that are trying to protect the Dingoes being intimidated and persecuted for their efforts?

4.

Why is the hazing concentrated in an area where the State Government plans to MARKET an ECO-TOURISM RESORT??

We not only expect answers but also action..

The culling must stop now and the gene pool of pure Dingo be preserved.

Management must be handed over to the appropriate experts before it is too late. Government not only has a duty of care , but a moral obligation to protect the fragile eco-system of Fraser Island, and that includes protecting our iconic Dingo from extinction..

Awaiting your prompt action..

394.	Patty & Doug Shenker & Stoll	Los Angeles, CA	My husband and I recently visited Fraser Island and we learned from our wildlife tour guide of the prejudice and utter disregard for these indigenous animals. He told us of the media's hysterical reporting, of parents who don't watch their children and are knocked over for the food in their hands and other human follies that is wiping out this species. It made us sick. Please save these endangered species. Many tourists come to see Australia's beautiful landscapes and their amazing animals, and the dingoes are on one of them.

407.	patricia hudson-moses	bishop auckland, United Kingdom	Through concerned Australian family, I have become more and more aware over a couple of years of the terrible plight of the Dingo. I have sought out information for myself also on this topic, and am appalled!! When I think of Australian Icons I think Kangaroo, kowala, Aborigine and Dingo. Soon you will have killed (bountied and poisoned) one of your icons. Want to explain that to the world? More and more the internationals are looking to Australia with the same horror we feel for the Japanese and their whale slaughtering habits. At least they EAT their kills and there is a purpose to it all.
408.	valda purvis	Caloundra Qld., Australia	What do the Dingo's eat?they appear to be starving,so thin,keep the silly tourist's away from them,and provide food for them,before it's too late.
409.	Julie Ryan	Hervey Bay, Australia	Please help these poor animals. It's not their fault they are "attacking" humans... they are starving to death. I have seen it first hand myslef. Yes, they are a naturally slim animal, but come on, they ARE NOT suppose to be that thin. If you are worried they will attack more often, then the simple solution is to stop people going to Fraser - simple!

425.	Michelle Kraatz	Rockhampton, Australia	Shame on the Queensland Government! How dare you. You are disgusting, inhumane, disrespectful and barbaric people. It is about time that you protect our Dingoes. They are an indigenous animal yet you fail to protect them. It is disgusting that you also offer \$140 for each slaughter of a Dingo on the mainland. I was in Roma last week and there was four Dingoes hung up for all to see on the road reserve. CSIRO has proven that the Dingoes are ecologically important. You have ruined our Dingo populations on the mainland because of the introduction of 1080 and that is also why that the ones left on the mainland are mainly hybrids. Stop this sickening slaughter now for all of our Dingoes and have them nationally protected!!!!

463.	Sue Bloom	Toowoomba, Australia	
464.	Maureen Jackson	Warburton, Australia	I am disgusted and angry at the Queensland Government for even thinking of exterminating the Fraser Island Dingo, they are pure breeds and should be protected, they are part of the reason people go to Fraser Island, why must you people kill everything, and they should also be fed by rangers so they don't cause a problem for visitors by scrounging for food the visitor leave behind and manage the population by giving them birth control in the food that would make sure the population didn't get out of control.
465.	Trevor Passey	Hervey Bay, Queensland., Australia	
466.	Penelope Bassett-Scarfe	Thornbury, Australia	<p>There seems to be a culture of death and destruction within the DSE or those departments that are supposed to be taking care of the animals. Its kill or shoot, or starve or whatever can be done to be rid of them, rather than assisting our wildlife.</p> <p>During the fires in Melbourne 80% of wildlife died when the fires ravaged Victoria, and we cheered and applauded when some were saved, now once again they are treated as pests.</p> <p>The ducks, the swans, the kangaroos, the cats the dogs in pounds all seem to be at a disadvantage when they come up against those departments that look after the wildlife and animals within Australia.</p> <p>And the so called experts, who deal with this, who are paid by the government seem to be a part of this culture that obliterates animals rather than working out a way to save lives, they annihilate them</p> <p>A bit like the concentration camp attitude</p> <p>The DSE here in Melbourne recently snuck out in the middle of the night and shot some kangaroos that had been trapped due to building construction. The wildlife organisations had worked for 4 years going through all the right channels all the correct procedures, they had the money, the place to relocate them the council was helping, the residents of the area were helping, and yet, without notice, the DSE shot the kangaroos. This death and destruction trend in these departments require an overhaul, and the Dishonourable Kate Jones needs to get her facts right, and look beyond what the rangers on Fraser Island say about the dingoes.</p>
467.	Gordon Raymond STORER	South Bingera., Australia	I live close to Fraser Island, but have never gone there, as I believe these beautiful creatures have enough troubles without another visitor to the island. Many years ago, the wild goats were exterminated, then the wild horses were <i>(continues on next page)</i>

	Name	From	Comments
467.	Gordon Raymond STORER	South Bingera., Australia	<p><i>(continued from previous page)</i></p> <p>cleaned out, which left only the kangaroos and wallabies to provide food for the dingoes. The old dogs ate the last of these out about 10 to 12 years ago. (information from Qld Parks and Wildlife personnel) Since then there has been a steady decrease in the dingo numbers due to STARVATION, and indiscriminate culling by Government Rangers, as the result of a child being attacked and killed by starving animals. Visitors are banned from feeding STARVING animals and in fact two persons are even now being prosecuted for interfering with (feeding) starving creatures.'ve been told that the dingoes feed on lizards and other things they find in the bush,WHAT THINGS?? A canine that starts eating lizards and their kind soon loses condition and cannot survive on them alone, and there is nothing else at all left for them to eat. (To the QPWS, if you disagree with my observations, then STAND UP IN COURT AND TELL US ALL HOW THEY SURVIVE AND BE PREPARED TO PROVE YOUR ASSERTIONS) As a born Australian I(am completely dismayed and disgusted that these beautiful creatures, or any other living creature, should be subjected to such inhumane treatment. This problem has been created by humans and now it is up to us to provide the answer and stop the last few pure strains of dingo in the country from becoming extinct, by the hands of those who are supposed to be looking after them. SHAME SHAME. AND FURTHER, our Aboriginal people had these self same dingoes as camp pets, hunting dogs and live hot water bottles for eons before white man ever became involved and their Dreaming stories do not mention people or children being killed by them.</p>

472.	Linda McCullough	River Heads Hervey Bay, Australia	<p>I live on the mainland overlooking Fraser Island. I have been observing the Fraser Island dingo for over 20 years and is quite clear to me that there is a deliberate plan to starve the dingoes to extinction. Most food sources have been eliminated, how much more food supply is going to be taken away from this island which will force the dingo into extinction, what a terrible shame that would be. Something needs to be done very soon, to set up some plan to save these dingoes. These dingoes are a vital part of the spiritual history and future of Fraser Island. Please please please do something.... before its too late.</p>

I have photos taken just a few weeks ago and it would be an enormous stretch to say the dingoes are "lean". They are more like skeltons covered with fur. We need to provide feeding stations ... please!
510.	Patricia Randolph	Portage, WI	Evidently much of the rationale to kill dingoes is facilitating livestock production for profit. Slaughterhouse production of cattle, sheep, pigs, goats, and chickens etc. is the SCOURGE of the planet. Until we grow up as a species and realize that we have really BAD habits - among them overbreeding ourselves, and STOP EATING OTHER ANIMALS, we will continue to destroy the web of life and our earth. Slaughterhouse production causes 51% of global warming, is despoiling our water systems, destroying our former wetlands, prairies, forests, and even our oceans with run-off - and is the rationale for destroying natural predators and all wildlife seen as a nuisance to profit from confining and killing every other poor creature at our merciless hands. And 1080 is a poison that goes right through the food chain. An animal is poisoned with it, then another animal eats that carcass and dies and so on - it is <i>(continues on next page)</i>

	Name	From	Comments
510.	Patricia Randolph	Portage, WI	<i>(continued from previous page)</i> a deadly poison for every creature that comes in contact with it indiscriminately. HOW STUPID HUMANS ARE! STOP EATING OTHER ANIMALS if you want a living world and stop poisoning and killing everybody else and we have a CHANCE, if we do not overbreed ourselves into extinction, of having a web of life and brotherhood of animals to sustain us. OR continue to abuse every other creature on earth and gluttonize yourself with animal protein and animal fats into an early grave.

550.	Colin Peel	Dunbible, Australia	It would appear that the 4 wheel drivers are the ones that need to be kicked off this Island. I'm quite sure they are doing a lot more damage than these original occupants. One can only imagine with horror what this planet is going to look like if this sort of thing continues!!
551.	Tomballe Philippe	Engis, Belgium	
552.	Mungo MacCallum	Ocean Shores, Australia	The policy of getting rid of the dingoes from Fraser is not only cruel, but very short-sighted. These pure bred animals are a priceless source of genetic information which may produce important information regarding the original settlement of Australia. And of course, if controlled (rather than killed) they are also a tourist attraction. They should be regarded as an asset, not a liability. The environment of Fraser Island was not designed exclusively for human trippers. Very sincerely Mungo MacCallum

622.	Leanne Stone	Shailer Park, Australia	<i>(continued from previous page)</i> due to people feeding them and trying to pat them like domestic dogs. SAVE THE DINGO!!!!
623.	Kym Hansen	Urangan, Australia	I have grown up in Hervey Bay and i remember visits from my childhood going to the island. We NEVER had an issue with a dingo. These animals need to be returned to their status of a natural trophic modulator for Australia, they need RESPECT, afterall, it is US who are in their territory and there is scientific proof that they have been in Australia and on Fraser Island long before the "whites" took over. QPWS and their DERM Death Dealers need to wake up. These animals have been habituated for thousands of years as peaceful camp followers - the dingoes are suffering and so are the people. STOP THE IDIOCY and bring back a fair go for Australia and ALL Creatures great and Small!!!!
624.	Bernadette Waters	Morningside, Australia	The dingos are a part of the heritage of Fraser Island.
625.	Graham Hoare	Brisbane, Australia	
626.	Sara Hanggi	Rockhampton, Australia	I believe that DERM has a responsibility under the NCA 1992 to protect native australian wildlife and that this responsibility extends to perceived 'problem wildlife' that are involved in conflict with humans for whatever reason. Wildlife are under threat and coming into conflict due to rapid urbanisation of natural areas and loss of habitat and where DERM cannot protect such habitat there should be some level of accountability for displaced wildlife. Over the years MOG changes have revealed a disturbing trend within former EPA now DERM and this is not going unnoticed. For some reason DERM does not wish to take any responsibility for wildlife that does not occur in National Park Areas even though such wildlife is considered the property of the State. This trend of relenquishing responsibility for the protection of native plants and wildlife, habitat and their well-being is a cause of contention for conservationinsts, wildlife carers and members of community alike. If it is not the responsibility of the Department of Environment and Resource Management (which is essentially funded by Australian Taxpayers) then whose responsibility is it? You cannot possibly expect community groups and members of the public who visit Fraser Island to solve the problems facing this isolated population of dingoes. Only DERM has the capacity to collaborate with DEWHA and fund much needed research into behavioural ecology of the Fraser Island Dingo and implement management programs to address the problems that face this population. This is what the voting public expects of <i>(continues on next page)</i>

649.	Kim Thomson	Derby, Australia	I have lived out bush with wild dingoes for many years in the kimberleys in Western Australia, and out here we have successfully combined tourism management with dingo conservation for over 20 years at our wilderness tourist resort. Our resident dingoes have become 'tourist attractions' at our tourist resort, which is in the middle of a conservation park. This conservation park is governed by strict regulations on where tourists can and cannot go bushwalking and 4 wheel driving. This reduces the impact of tourists on the wildlife (including the wild dingoes). From personal research I have conducted on the Fraser Island dingo situation, I have found the currnet management program to be extremely inadequate. Action needs to be taken immediately to ensure the dingoes that remain on the Island which have survived culling regimes, relocation, vehicle strikes, adversive conditioning (hazing/collaring), and starvation are officially and adequately protected within Fraser Island's WORLD HERITAGE PARK.
650.	BARBARA HOLLEBRANDSE-DE BOOY	SYDNEY, Australia	
651.	Luis Eduardo Zuniga Moreno	Guayaquil, Ecuador	
652.	Gary Crockett	TorquayQ, Australia	It is common knowledge here in Hervey Bay that the Australian government department in charge of the Fraser Island Dingo has failed miserably to protect this pure strain dingo and this is resulting in the deaths of many dingos on the island. These dingos must be fed if they are to survive. They are important to the Butchella Aboriginal peoples history, they are important to tourism and they are important to Australia. We must not lose this part of all Australians aboriginal and non aboriginal because pen pushing city politicians and lousy DERM management. Kate Jones has her head stuck in the sand while good, honest caring people are being prosecuted by a deparment that is itself immune from Australian law. Which in itself is wrong. All Australians and government officials should be answerable to Australian law.

	Name	From	Comments
653.	Gary Crockett	Torquay, Australia	<p>It is common knowledge in the town of Hervey Bay that the dingos do not have enough food and the DERM is exterminating the Fraser Island Dingo.</p> <p>This is a disgusting situation and very upsetting to the Aboriginal Butchella people here in Hervey Bay who have traditional and cultural ties to the island dingos.</p> <p>These dingos need to be fed, local people here in Hervey Bay including the member for Wide Bay Ted Sorenson are being ignored by our elected politicians in Canberra.</p> <p>Good honest, caring people are being prosecuted for trying to help the Fraser Island Dingo.</p> <p>Now the governments activities are exposed they will have to face the music, burying thier heads in paperwork and ignoring the general population of Hervey Bay is not working anymore.</p> <p>Time to face the music Kate Jones.</p> <p>The RSPCA also has a lot to answer for handing over Jennifer Parkhursts prepared submission to them to DERM who then used it to prosecute her.</p> <p>What has Australia become when good peoples lives are being destroyed by our government who is itself immune from Australian law? When our government officials ridicule our local member of parliament and refuses to listen to the voices of people who live here and know what is happening.</p> <p>This is simply wrong and smacks of an official cover up.</p>
654.	John M Walsh	Cooloola Cove, Australia	
655.	Sharon Richardson	Melbourne, Australia	This is an absolute disgrace - The Fraser Island Dingoes deserves to live!!!!!!!!!! Act now before it is too late!!!!
656.	Alex Boulton	Joondalup, Australia	There's enough research shown that without intervention, the dingo lies within the same fate as the thylacine. So please, protect our largest native predator and don't let it become a memory of the past

709.	Hermann Zimmer	Berlin, Germany	<p>My wife and I have recently been to Hervey Bay and were going over to Fraser Island but friends told us of the skinny dingoes and that if one approached a tourist the rangers would shoot them. I could not go, knowing that this could happen to such a beautiful animal!! and when I get home I will tell the tourist operators and my friends of this terrible situation and to not go to Fraser Island. Very sad, in my country rangers are there to protect the animals, not shoot them!!</p>
710.	Szymon Dziamba	Lublin, Poland	
711.	Drew Forsyth	Monto, Australia	<p>Removal of the ponies has caused this problem as the Dingoes lived on them.Re removal of dingoes to the mainland this is a waste of Tax payers money and extremely unfair because they have no fear of man, they have been droped close to landholders and helecoptered into one reserve, and they have been immediately shot, they were seen to be lounging on the front lawn of one homestead in a friendly style, what a waste, they should have been made aware of gun shots and fear of humans before bringing to the mainland. As a presveration means, please be sure not to let this happened. I know a lot about Dingoes as I owned a dingo as a pet for many years and have had bad experiences with cross bred dingoes with the taking of calves on our property, this cross breeding is actually worse than the pure dingo.</p>

719.	Wanda Grabowski Shirley McRae	Glasshouse Mountains, Australia	We would like to add our voices to others and ask that the dingo be considered with the care, compassion and empathy all native wildlife deserves. They are unique to this country and need to be protected accordingly. Most of us care for our domesticated dogs, their wild ancestors should be provided with the same opportunities. These are to have sufficient healthy and nutritious food and water to meet their needs and those of their offspring. They require freedom to roam and not be harrassed physically, mentally or emotionally for the edification of sick human beings. They have the right to be respected for the important role they play in balancing an ecosystem already challenged by human impacts. Humans need to do much more to help the wildlife that calls this special land home.
720.	clare howell	Wiltshire, United Kingdom	
721.	Pat and Judy HANVIN	SOUTH BINGERA, Australia	Pat and Judy Hanvin
722.	Charmaine Brayley	Kippa-Ring, Australia	Can you sleep at night knowing that you CAN do something for these curious, intelligent animals - and you are doing nothing. Humans caused this situation by the introduction of brumbies and when humans changed the situation by the removal of the horses which was an important food source, nothing was done to supplement the dingoes. SHAME, SHAME, SHAME.

727.	Suzanne Trueman	Caloundra, Australia	I have been a wildlife carer all my life and cannot believe that our native animals can be so brutally abused by such a lucky society. Our wildlife is so important to the health of our planet and nature had a perfect plan, but greed and lack of education has caused so much to be lost. It is the biggest outrage that stupid people without the correct knowledge,can allow starvation of a unique species to be lost - we will not get a second chance! Lets all voice our anger as they are dying!

731.	sarah moerman	iluka, Australia	this is disgusting!!!!Frazer island is a national icon and the dingo is our native dog and we are letting them starve to death in the enviroment we ruined....so typical of humans.....
732.	Sarah Tucker	buderim, Australia	Our Dingoes in my view should be recognised of course as one of our most amazing Australian Native animals and protected in everyway possible. How can these animals be left to stave there is not enough wildlife on fraser island to support the diet of these beautiful animals. I believe a regular food drop should be done to support these animals this could be done in a manner so feeding is not associated with humans.
733.	Tosh Tucker	Buderim, Australia	
734.	Gail Gipp	Cooloola Sands, Australia	It never ceases to amaze me that in this day and age we still continue to have to fight to save our precious wildlife. When will we learn that in the overall scheme of things "WE" are just another species, once we destroy everything elsewho will save us?
735.	Justine Oxley	Brisbane, Australia	I grew up in Hervey Bay and went on many family holidays to Fraser Island in our 4WD. Over the years we've noticed a dramatic decline in the number of Dingoes and changes in their behaviours. I witness two situations that broke my heart then and still do today. I saw a Dingo so emaciated bones were sticking out everywhere possible; it was so weak it barely had the energy to walk. Near Indian head I saw a ranger arrive in their 4WD and when they got out of the car the Dingo bolted into the bushes with its tail <i>(continues on next page)</i>

	Name	From	Comments
735.	Justine Oxley	Brisbane, Australia	<i>(continued from previous page)</i> between its legs. The sight of the car and the uniform was enough to scare the Dingo into hiding. What are they doing to them that we don't know about that provokes this kind of behaviour? Fraser Island is a World Heritage Listed Island. If we don't protect the dominate predator on the island there will be severely detriment affects for the rest of the ecosystem. Take a look at Lady Elliot Island, every creature big or small, including sharks! are protected with the upmost respect. Because of this the island has regained its pristine state after years of mining and habitat destruction. I am only 21 and human ignorance is constnatly on my mind, continually chipping away at my faith in mankind. How can we not care about our planet, our home?
736.	Sally Kilpatrick	North Rockhampton, Australia	I also grew up in Hervey Bay, with Fraser Island being our pride and joy. I worked in a backpacking hostel for a while, and one of the highlights of touring Fraser is seeing the dingoes. As an organisation we provided information regarding these wild animals, such as advising tourists to pack away food items properly, and not approach the dingoes etc... We never once had an issue with the animals. It breaks my heart to see the condition they are in. Fraser Island is the natural habitat of these wild animals. WE are invading them, not the other way around. How many species must we destroy before we are comfortable? These animals should be protected and respected. Instead, they are hunted and starving.
737.	Sonny Smith	Hervey Bay, Australia	I am asking the International community (especially if they know of World Heritage listed Fraser Island, to comment if they would visit, knowing that an iconic Australian species is being exterminated.. Aussies: you know what to say..
738.	Jizelle White	Gold Coast, Australia	
739.	Barbara Bennett	Lafayette, IN	Please save the Dingoes! This iconic species should not be allowed to be exterminated.

745.	Nicole Dwyer	Iluka, Australia	I am aware that the public and the Government have left the issue of the Dingoes on Fraser Island way to long. To the point of the native animals extinction. About five years ago the Government ship hundred of Dingos out to Stanthorpe and the farmers have have a hideous time culling these dogs who where killing there cattle. Now we are leting them starve, the most inhuman way possible. This should not be happening. It does not have to be like this. A solution could be to ask the public to file a request to adopt pups at least chip not desexed. If there found to be feral the owners are then prosecuted. Please they do not deserve to starve. Thank you
746.	Megan Mackander	Hervey Bay, Australia

777.	Gwen Gill	River Heads, Hervey Bay, Australia	<p><i>(continued from previous page)</i></p> <p>population has lost it's food source. The Government took away the brumbies which were a natural food source for the dingos. Then they took away the tip. There were never anywhere near as many incidents of so called "Dingo Attacks" while there was a food source for the dingos. The Government and Councils blame visitors and tourists for the attracting the dingos with food as a cause for the attacks. In some aspects this may be correct, but with majority of main food sources taken away from the dingos, there was always a going to be an issue of hungry dingos. Stop culling our dingos and start supplying these precious animals with a food source. If it is an environmental issue, think about what native animals can be let loose to breed of Fraser so the Dingos actually have something to hunt and eat. There will be less attacks as they are a naturally timid animal. They are just starving. It would be a dreadful shame for us to lose the last of these pure blooded dingo. Feed them and the incidents will be dramatically lessened. You can save children's lives by feeding the dingo. Bring back a food source.</p> <p>If you didn't feed your own dog for a month and left it to scavage in your backyard, you can guarantee it will attack for food also.</p>

798.	Jennifer Parkhurst	Rainbow Beach, Australia	<p>Most people would be marginally aware of how utterly cruel the process of starvation is. However, for us locals who watch dingoes starve first-hand, year after year on Fraser Island, the reality defies imagination. Death usually takes around three weeks. Starvation can also continue in a prolonged state for years. Prolonged starvation can cause the dingo permanent organ damage.</p> <p>During starvation the body first depletes all glucose reserves, in order to keep vital organs performing. Then it breaks down the fat stores, the last of which is the marrow in the bones. When the body has broken down all the fat it then begins to break down its own muscles and internal organs in an attempt to keep the nervous system functioning.</p> <p>Starving animals are often too weak to sense thirst, and therefore become dehydrated, itself an extremely painful condition. Symptoms include muscle cramps, dizziness, delirium, swelling of the tongue, and seizures. Heart rate can rise due to decreased plasma volume and blood pressure can intensify, leading to heart failure. Body temp may rise, breathing may slow down as lung capacity is reduced, and the weakened immune system leaves the victim susceptible to disease. The dingo may suffer from frequent, often fatal diarrhea.</p> <p>The pain becomes very intense. Muscles degenerate, until muscular action is no longer possible. Muscle atrophy (shrinkage) makes the shoulder bones, ribs, vertebrae, and pelvis appear prominent. Dry, cracked skin makes all movement painful.</p> <p><i>(continues on next page)</i></p>

Name	From	Comments
798. Jennifer Parkhurst	Rainbow Beach, Australia	<p><i>(continued from previous page)</i></p> <p>The animal eventually succumbs to fatigue and apathy. Interaction with the surrounding world diminishes. Hunger may be temporarily appeased by eating a food substitute – tin foil, paper, twigs, chewing gum, plastic bags, leaves and charcoal are commonly found in the guts of autopsied FI dingoes (eg: ‘Stomach contents=Fish, apple core, vinyl (very bloated) Intestines=Full of blood (blocked’).</p> <p>Due to delirium, pain associated with starvation can decrease as symptoms get worse, however the pain of dehydration persists until the subject becomes unconscious or eventually dies. Death may result from heart failure, lack of sufficient blood glucose to provide the energy needs of the brain causing hypoglycemic shock or simply as a result of the body being unable to perform the functions necessary for life.</p> <p>The information above is difficult to read, but it is possible to read it and move on. However, to actually look into the eyes of an animal suffering such a fate, is unbearable.. Yet watch them suffer is all we can do.</p> <p>Please help us to support the very precious population of Fraser Island dingoes. With appropriate information and educational programs, we can bring people to a greater understanding of the character of the dingo, and the importance of pack social structure. We wish to implement a new, transparent management program including random food drops at certain times of the breeding cycle, appropriate census information, non-intrusive observation and independent research. We also wish to change legislation, so that the dingo is fully protected on the Island.</p>
799. Darryl George	Mitcham, Australia	<p>My experience is that WHEN THEY OWN THE INFORMATION, THEY CAN BEND IT ALL THEY WANT. that seems to be what the Government is doing here. Wise up Australia and take a real look at what is happening.The rest of the world is obviously watching.</p>

801. Richard Taylor	Port Douglas, Australia	<p>Fraser Island is meant to be a World Heritage Listed Site. The native animals are starving and being culled, the beaches are covered in marine debris and that is what the QLD Government calls "protected"????</p>
802. Clive Morris	Hobart, Australia	<p>I am amazed at how DERM are handling the Fraser Island Dingo Problem. I am amazed there are still dingoes alive there given the treatment of these beautiful creatures. I am amazed at how callous DERM are in relation to treating a beautiful icon of Australia. Taking the food chain of the dingoes off Fraser Island was DERM's first big mistake. Then allowing these beautiful, native animals to starve is</p> <p><i>(continues on next page)</i></p>

	Name	From	Comments
802.	Clive Morris	Hobart, Australia	<i>(continued from previous page)</i> another example of their lack of concern. I wonder how long the DERM Rangers would last if their food chain was taken away as brutally as the dingoes' food chain has been. One of the joys of tourists visiting Fraser Island is to see a wild dingo. I wonder how long it will be before these beautiful animals join the list of the extinct variety. I am very familiar with the Government of Queensland and how they are handling this problem. I ask that the Hon. Kate Jones, MP, Minister for Climate Change and Sustainability in the Rudd Government, has the courage to give these dingoes the love they deserve to live a happy life on Fraser Island, one where food is readily available, rather than the miserable, starving life they are enduring at present. Some of the pictures coming out of Fraser Island depict an animal so emaciated were it a dog it would be put down rather than allowed to suffer. Then there is the dingo eradication of placing poisonous baits, the hazing of dingoes - the list goes on and on. I would like to see DERM rangers subject to the same immoral and degrading treatment these dingoes are forced to endure just to survive.

815.	Tony Knight	Scotterthorpe, United Kingdom	I have been fortunate to have been in direct contact with dingoes during my time in Australia, and I know that as long as humans respect the way that dogs behave there is no danger. I realise that it is much more expensive to embark upon a program of educating people than simply killing other animals, but there are times when common sense should be used, and it is the purpose of elected officials to show good leadership and lead by example. If beaches clearly mark the danger posed by jellyfish, why is the dingo not equally respected, even though it is not even close to being as big a threat?
816.	Rita Power	Gunns Plains, Tasmania, Australia	
817.	Gisela Kaplan	Armidale,NSW, Australia	The dingo is a highly evolved and important part of Australia's biodiversity. It is also a highly endangered species and ought to be accorded the urgency and positive treatment to save it. It is most objectionable, under any circumstances, to see any animals starved, mistreated or secretly shot. It is even more objectionable if the motives behind this might be related to tourist dollars. Moreover, indiscriminate deaths create havoc in the social fabric and in the important passing on of essential knowledge thus leaving the remainder of the population in disarray and distress. Both, on physical and other grounds, the current state of affairs is appallingly contrary to internationally agreed basic standards of animal welfare and an ethics of care.
818.	Ryhorchuk Gillian	Earlston, Victoria, Australia	It is a shame that dingoes on Fraser Island are becoming rarer by the minute, due to the treatment dealt thm by DERM. If Australia can take Japan to task, then the government needs to look at itself and its lack of dignity and foresight <i>(continues on next page)</i>

824.	Peter Brady	Tewantin, Australia	The Dingo population on Fraser has forever been associated with humans in a cohabitational manner of one form or another - forever, until now. QPWS or QPW or DERM or whoever they are this week are putting modern "public liability paranoia" ahead of the welfare of the Dingo. Educate visitors, inform them and monitor them properly - and fine them if they disregard the rules. Put the Dingo ahead of the visitors. Respect the Dingo. Save the Dingo. You are currently supporting red-neck anti-Dingo attitudes which will ultimately see the Fraser Island Dingo population decimated to the point of unviability - and then extinction. Shame on you, Kate Jones. You are acting dishonorably.
825.	Deborah Tuddenham	Dunlop, Australia	
826.	Leonie Bridger	Tewantin, Australia	These animals have more rights than the visitors - they have been there much longer. They have always had humans as a food source offset; scraps, dumps, dead feral animals (brumbies etc). Now those all-knowing rangers have decided to change the way the dogs have successfully survived for thousands of years. I imagine that this will have a negative impact on the other native wildlife and most certainly the dogs. Save the Dingo - modify the behaviour of the Visitors.
827.	VILMA BRIDGER	TEWANTIN, Australia	I think the dingos should be left to live on fraser they took the horses away so the dingos have no food they are the only real pure dingos left leave them alone
828.	Lee Steindl	Coochiemudlo Island, Australia	In all other countries, iconic animals are protected and proudly promoted, and yet in Australia they are considered a nuisance to tourists, and eradicated wherever possible. I guess thats easier than finding a way to deal with the situation that suits both sides, tourists and animals.
829.	Keira Olsen	Joyner, Australia	Australia should be protecting this species!

898.	claude giral	nambour, Australia	By lowering the humans/4 wheels drive impacts, let the fauna and flora of this magnificent World Heritage island time to recover. The Fraser island dingoes are an intrinsic part of it!
899.	Leigh King	TIN CAN BAY, Australia	If we had our own animals in this state of starvation we would be fined by the RSPCA. You only need to look at the dingo's in Australian Zoo to know that the dingo's on Fraser Island are dying a long lonley death of starvation <i>(continues on next page)</i>

	Name	From	Comments
899.	Leigh King	TIN CAN BAY, Australia	<i>(continued from previous page)</i> and then extinction. Shame on you Kate Jones you shouldn't have that position in Government!
900.	Stephanie Rowland	Perth, Australia, Australia	
901.	Roz Molyneaux	Pialba Queensland, Australia	
902.	allan suter	toogoom, Australia	
903.	Val Laver	Pialba, Hervey Bay, Australia	I have been in tears looking at photos of these poor creatures. It is cruel treating them like this. Please save our dingoes.
904.	Jodie Woulfe	Hervey Bay, Australia	From what I believe, the dingos didn't attack anyone until their food source, the brumbies were removed. Furthermore, after the dingo fences were erected, the food sources that were left available ie: goanas, now also elude the dingo, thus leaving this poor animal starving & desperate. Common sense tells you that if you starve an animal then they will find food anyway they can. This is a disgrace, the largest sand Island in the world, heritage listed, inhabited by the purest of dingo. How are you going to sleep at night, knowing you have eradicated this creature by starving them to death. If you did this to a domestic animal you'd be arrested & charged in a court of law & that's exactly how it should be. Animal cruelty charges should be brought against you immediately.
905.	Darren Bowles	Pialba, Australia	
906.	J Cullen	Noosa Heads, Australia	Dingoes must be saved and protected - long term.
907.	Judy Parkin	Mt Coolum Qld, Australia	I shall be visiting Fraser Island for the first time in a few years and having seen and heard about the plight of the dingoes there I am dreading the experience. Doesn't the Government realise that this is the purest breed of dingoes left and once they are gone, they are gone forever. There must be some way of providing feeding stations to help these animals. Otherwise I fear that caring people will start taking the matter into their own hands. Starvation is a cruel and agonising death.
908.	Janet Watson	Gateshead, United Kingdom	The tourism authorities might like to consider that people will choose not to visit Australia if by doing so they help to exterminate its unique fauna.
909.	Lorry Pearce	Hervey Bay, Australia	Having worked with overseas visitors they come to Fraser Island to see our dingoes let's not lose them. Fraser Island would not be the same without its dingoes.

977.	Shannon McGreavy	wa, Australia	
978.	Katarzyna Kulikowska	Gdansk, Poland	
979.	Wiesiek Milimen	Gdansk, Poland	
980.	Gemma Clarke	Gold Coast, Australia	This is an absolute disgrace. I visited Fraser Island annually as a child and never had a single problem with dingoes, despite the plethora that I saw. I went last year, as a twenty year old, and was heartbroken to find that in the week I spent there I didn't come across a single one of these beautiful creatures. Native species in every other national park in the world are protected - why should dingoes be any different?!
981.	Laetitia Deliot	Buellas, France	
982.	Tony Tony	Chago, IL	This is cruel because you are killing off one of your icons. I love dingos but we have upset the natural chain and we have embarked them on a program of extermination, i.e. extinction.. Save them stop the gov from killing dingos
983.	Sarah Buse	Liverpool, United Kingdom	I am an Australian currently living in the UK. I am passionate about dingo's and have personally known 2 for many years in my life at a wild park I used to volunteer at. I have always seen Fraser Island as the last safe place for pure dingo's until all this brutality and extermination started. If other small island countries i.e. Indonesia, can live in harmony with their dogs that are most likely the same breed as the dingo then why can't we do the same. Fraser Island should be a place for the dingo's and not the people.... killing dingos is wrong.... just like killing tigers is wrong. Give the dingo's back their Island!!!!
984.	Louise Carr	Noosaville, Australia	
985.	Jan Campbell	Kilkivan, Australia	
986.	Krasimira Buyuklieva-Darzeva	Stara Zagora, Bulgaria	
987.	Karen Buckley	Hamilton Hill, Australia	The Fraser Island dingo needs to be protected. Please help!
988.	Virginia Burrow	Moree, Australia	

	Name	From	Comments
989.	Kim Williams	Yattalunga, Australia	I have just visited Fraser Island and it is heart breaking to see the dingoes. They should not be exterminated Fraser Island should be a wildlife sanctuary for dingoes and other native animals. People should be aware of the dangers and act accordingly.

1,296. lisa calleja	Northcote, Australia	
1,297. Rosie Bookallil	Mullumbimby, Australia	
1,298. Anne Cox	Highton, Australia	What is happening to the dingos on Fraser Island is a disgrace. Native animals should be protected in National Parks not shot, poisoned and left to starve as a deliberate policy by the park rangers who should be looking after them. If a visitor is attacked by Dingos on Fraser Island it is because of the stupid, cruel and totally unbelievable management practices by the rangers and they, and the government department that employs them, should be held responsible. If these rangers are so incompetent that they cannot even tag an animal correctly then they should be sacked. Let someone who knows what they are doing run Fraser Island. It is too important a place to be controlled by this organisation who is now bringing it to ruination.
1,299. Rhonda Hill	Cooktown, Australia	Save the dingo on Fraser Island.
1,300. lynellen foster	maryborough, Australia	We have to do something before it is too late.Stop the suffering.
1,301. Yvette De szabo	Bondi beach, Australia	The condition and treatment of these beautiful animal fills me with both safeness and anger. As a kid in the 70's we would go to Fraser island regularly where people were encouraged to leave food for them. Maybe that is nit the answer but shouldn't we be finding the right answer to protect these animals before it is to late. It breaks my heart to see these animals dyeing of starvation and not given a chance of life. Owners of domestic animals would be prosecuted. Why does the minister for climate change and sustainability get away with it.
1,302. Peter Dolley	Kippa-ring, Australia	It should never get to the stage where the authotities need to say everything is OK becuae there is a healthy litter from the 2010. The authorities have changed there ways, this means they did not know what they were doing in the first place - absolute disgrace Aust. Govt. Peter Dolley

1,310. Vicki O'Dell	Palmwoods, Australia	I have visited Fraser Island for many years and have seen these beautiful animals become so pitiful and unhealthy that I find it too distressing to visit now. Please do something.
1,311. Nicole Gaunt	Maleny, Australia	Please save the dingo. Our management of the dingoes has been a disgrace, lets learn from these mistakes and truly take care of these beautiful native animals.
1,312. gayleen anderson	coraki nsw, Australia	please save the dingos
1,313. Ddorothy Saunders	Brisbane, Australia	I abhor the slaughter of dogs and cats in certain asian countries for food. How unthinkable is it that WE can be so cold and uncaring for OUR animals.
1,314. Sara von Nordheim	WEST END, Australia	The dingo is an important part of Australia's natural environment and the environment needs to be managed to protect them, this includes people's decision to go to the island. Recently I visited Yellowstone National Park and they had lots of warnings for Bears, and basically if you were attacked by one, it was your own responsibility, because you had made the decision to go to the national park. This should be the same for Fraser Island's important dingo. I'm a citizen of Queensland, Australia, and I want people's decisions to visit Fraser Island to have no impact to the Dingo or its habitat, and no Dingo is ever shot because of a persons decision to put themselves or their children into danger.
1,315. Niki Selig	Caloundra, Australia	Please help save the beautiful Fraser Island dingoes.
1,316. Gary Holmes	Rockhampton, Australia	I demand this situation be stopped. I do not want DERM to continue starving these animals to death by poor management practices.

Name	From	Comments
1,317. Kathryn Williamson	Lane cove, Australia	I have camped on Fraser island and the humans are the ones that need to be banned. The aboriginies should be granted the land and have the choice to protect the dingo. The treatment and misunderstandig of these animals makes me sick.
1,318. Tam Donald	Yeppoon, Australia	The Fraser Island Dingo should be protected.
1,319. Sue Fisher	Melbourne, Australia	The Fraser Island Dingo should be protected.
1,320. Lesley Palma	Airlie Beach Qld, Australia	Prior to watching the Australian Story program on the ABC I had no idea, absolutely no idea, of the plight of these beautiful animals. Shame on you Queensland Parks & Wildlife and shame on you those tourists who will not observe the rules and regulations which govern visiting Fraser Island. Once again we are witnessing an animal tragedy that should never have been allowed to get this far.
1,321. Chris Armstrong	Bathurst, Australia	There is a misconception that the Australian dingo is a species, when in fact it is a breed. The dingo is one of the oldest breeds in the world and the Fraser Island population is one of the purist in Australia but the Queensland Government has embarked on a policy that will ensure that the dingo is kept there in a state of starvation. As anyone knows, when a dog gets hungry it becomes less fearful and more likely to be aggressive in pursuit of food. So the policy of detaching the dingo from human beings has in fact backfired. The dingo also appears to crave human company. I submit that the Aboriginal people who are the original caretakers of the island and its wildlife should be permitted to take a more active role in caring for the island's dingo population without excessive and unnecessary government interference. The present policy of culling starving animals is akin to a concentration camp mentality and seems more in line with a desire to gradually exterminate this wonderful breed.
1,322. Melva Elvey	Maleny, Australia	
1,323. J Hall	Sydney, Australia	
1,324. Ian Menkins	Oakey, Australia	
1,325. Douglas McAllester	Sorrento.,perth, Australia	The Queensland government is showing how little it cares about our wildlife. Why don't you just shoot everything and let the minning coys destroy the rest bastards!!!
1,326. Julie Simpson	Tea Tree Gully, Australia	
1,327. Ursula Mack	wingello, Australia	Bureaucrats' red tape is killing our dingos on Fraser Island and neglects and starve them to death. Shame on a department that is supposed to be acting on behalf for our wildlife and in fact is shooting them and starving them. Just look at the photos of these native dogs and they are <i>(continues on next page)</i>

Name	From	Comments
1,327. Ursula Mack	wingello, Australia	<i>(continued from previous page)</i> walking skeletons. Make the island off-limits to tourists or at least give them feeding stations, after all their prey has been exterminated a long time ago. What are they supposed to feed on????
1,328. Claire Jones	Cairns, Australia	Dingoes are a noble and wonderful creature. We should make every effort to live harmoniously with these animals and to act as their guardians, not as their destroyers. All efforts should be made to save this animal now.
1,329. Chrissy Roberts	Toodyay, Australia	
1,330. D Boshart	KARRINYUP, Australia	
1,331. judy meyers	tamworth, Australia	save our dingo .. please stop then from starving to death so cruel so UN-AUSTRALIA
1,332. J McGeever	perth, Australia	Please wake up Australia and stand behind this cause. Send this link to everyone in your address book.
1,333. Andi Aldam	Littlehampton, Australia	
1,334. Julie de Ridder	Hazelbrook, Australia	please ensure these animals have enough food to survive, don't let this suffering continue
1,335. Jan Benson	Roninson, Australia	
1,336. Jadey Ward	Belrose West, Australia	To even consider culling these beautiful creatures is disgusting. They are amazing natural inhabitants of the island and I certainly will never return to the island again if they aren't there.
1,337. Marlies von Nordheim	Utrecht, Netherlands	
1,338. Merv Scanlan	Mornington, Australia	No animal deserves this treatment.
1,339. Mary Kenneally	Clifton Hill, Australia	There are enough places for bogan Aussies and others to go to play. Let the last remnant pure Dingoes have some territory. HAVE A HEART. Such cruelty is sadly the New Australia.
1,340. Robyn Congdon	Islesboo, ME	I live in Maine and a Queensland native. Isn't it time to consider limiting visitors to Fraser until the dingoes environment is stabilized. What's the point of protection if it means exterminations?
1,341. Lynda Moylan	Albany, Australia	stop the mal treatment of these beautiful intelligent creatures
1,342. Martin Walsh	Adelaide, Australia	
1,343. Lynn Curwin	Truro, Canada	
1,344. Timothy Dobbins	San Francisco, CA	This is not what I expect from Australia!
1,345. Lyn Backhouse	Armidale, Australia	I also made an official report of neglect of the Frazer Is dingoes to RSPCA - they said they couldn't act on my report!!!!!!!!!!!!!!

Name	From	Comments
1,346. alessandro locci	alessandria, Italy	
1,347. Roz Johnson	Nerang, Australia	It is illegal what the aprk and Wild life are doing to the animals
1,348. maria kadid	London, United Kingdom	
1,349. Susan Lynch	kariong, Australia	My husband and I went once. We saw emaciated Dingoes doing it very tough. All tourists wanted was a photo opportunity. I wouldn't go back again. All I experienced in this World Heritage area was drunken yobbos in 4 wheel drives racing up and down the beach enmasse and tourist buses everywhere. Management of this World Heritage area is an absolute disgrace. As far as the dingoes are concerned how can any civilised government legislate dingoes into starvation as a excepted form of culling and expect us, as civilised people to stand back, watch and do nothing. Legislating an introduced dog cannot magically transform it into native wildlife. It's a dog, it needs humans! Yes, they were here before white fella came but our indigenous people cared for them.
1,350. Louise Paine	Bardon QLD, Australia	To the Hon Kate Jones, please help legislate to save our dingos. This amazing breed of animal is unique to Australia as is the kangaroo and koala. To see these incredible animals starving to death is abhorrant. Please Minister, please take this petition to help save this wonderful breed and save the natural habitat for generations to come. On behalf of the dingos and those dedicated to their survival, please help Minister.
1,351. Sarah Stubbs	Gungahlin, Australia	I am so very embarrassed that this happens in Australia. Shame Shame Shame.
1,352. Denise Ellenby	Port Douglas, Australia	Please do not punish Jennifer Parkhurst for her actions. She, as I, is very concerned about the welfare of the Fraser Island Dingo population.
1,353. jennifer melville	tuggerah, Australia	i absolutely love dingoes and wouldhate for them to be destroyed we visit fraser island every year to support the dingoes please save them
1,354. jo shea	mapleton, Australia	I have traveled regularly to Fraser Island for ten years and have have been appalled as I've watched the deterioration in numbers and condition of the dingos. The 'management' of the island seems to be based on keeping tourist numbers up to keep the money coming. The dingos would not be aggressive if they weren't starving. For thousands of years the dingos had a cooperative arrangement, living with the indigenous people, sharing the food and helping with hunting. So, by pulling out of this harmonious co-existence we have taken away a long-standing food source. Its so obvious. They certainly don't deserve to be starved to death as a management strategy to keep the tourists feeling safe.

Name	From	Comments
1,355. sandra moye	Morayfield, Australia	Why can't the Australian Government implement feeding these Dingos once a day at a declared feeding site, meat and vegetables, mimicking their natural wild diet, therefore they would stay away from Tourists looking for food and not starve, or die of starvation! They would front up everyday at dinner time just like a domestic cat or dog, be fed and be healthy and happy!
1,356. Robyn Cook	Rye, Australia	What is happening on Fraser Island to the rare, pure Dingo is heartbreaking and must be stopped. We need support to save the Dingo and ensure they have a healthy and happy life on Fraser Island. Humans have enough of the country, they don't need to invade yet another sacred place.
1,357. Sally Muller	East Geelong, Australia	I saw the plight of the Fraser Island Dingo's on 'Australian Story' last night and was appalled and devastated by the QLD government's cruel and ignorant management of the pure Dingo population on Fraser Island. Education is required from the top down. When you snorkel in a conservation area in Hawaii, for example, you must watch a film on how to approach marine life before even stepping on the beach. ALL visitors to Fraser Island should be educated about the plight of Dingo's and how to treat them humanely. These beautiful, unique animals are starving, why isn't there a program in place to feed them? If they were not desperate, they would have no need to approach humans. Culling IS NOT the answer. And cruelly allowing and animal to starve is beyond belief.
1,358. Scott Portelli	Ultimo, Australia	
1,359. verna BODE	Hurstville NSW, Australia	Please act immediately to save these iconic animals. This cruelty must be stopped NOW
1,360. miriam glynn	Geraldton, Australia	After watching Australian Story on the ABC last night I was shocked to see the extent of the cruelty that the Queensland Government appears to condone . These beautiful native animals should not be allowed to starve - no wonder they are attacking humans ! The other side of the Dingo story has now been told thanks to Jennifer Parkhurst. People should avoid Fraser Island until the dingos are being managed properly.
1,361. Justin Stapleton	Nathan, Australia	As an ex Fraser parks employee, I know the management is pitiful. Do something now or be remembered as an environmental vandal.
1,362. Elizabeth Franklin	Belmont, Australia	
1,363. Monika Selig	Moffat Beach, Australia	
1,364. Brad Boyd	Ocean Grove, Australia	
1,365. Lois Hooper	Melbourne, Australia	

Name	From	Comments
1,366. Sandra Hill	Balingup,, Australia	
1,367. sally w	Woodford, Australia	We noticed that on our last trip to Fraser Island that there were a lot less dingos, now we know why. Shame.
1,368. Heike Cevasco	Maroochy River, Australia	
1,369. Suzy Edwards	Bendigo, Australia	It is most unfortunate that usually the people in authority ie the rangers/government, are not the people who care passionately about the welfare of animals and the protection of wildlife. Consequently egos end up coming first to the detriment of the animals who need protection.Shame Australia.
1,370. Marc Bennier	Adelaide, Australia	
1,371. Edward deBouter	Caparra, Australia	They must be properly looked after, and if that means feeding them, so be it. Disband also the Parks and Wildlife fools as well as the DERM.
1,372. Stephen Ballhagen	Wynnum, Australia	I have just returned from Fraser Island with friends. We enjoyed watching some dingoes from a distance early one morning, they were wary of us and seemed very timid. The next day we encountered a very skinny, malnourished female dingo who was not afraid of coming right up to our large 4wd in search of food. This sight really upset us and yet we could understand her desperation and fearless behaviour. My partner and I travelled around Australia for 2 years and I saw and yet enjoyed more dingoes on Fraser Island in 4 days than our entire Oz trip. Let's do what we can to save this precious species which is the oldest breed of 'man's best friend'.
1,374. Karen Slatyer	Wingham, Australia	This is cruelty in its most lowest form. Political madness gone wrong.

1,376. Anna Rodek	Mount Waverley, Australia	
1,377. Annie Ambrose	QUINNS ROCKS, Australia	I think this is appalling and like watching a horror movie going terribly wrong
1,378. Ursula Smolen	Moonee Ponds, Australia	Help save the dingo, get rid of tourism and keep our native dog from extinction
1,379. Caroline Kingston	Wynnum, Australia	I'm so disgusted of the treatment of the dingo. You take away their food source, now your starving them to death. Shame on the Government for allowing this to happen. You should all be put in jail for such inhumane acts. SAVE THE DINGOS ON FRASER!

Name	From	Comments
1,380. Elaine Botting	Mooney Mooney, Australia	Fraser Island dingoes are pitiful and need our help. The rest of the world is watching us, watching the dingoes die. If it was your neighbours dogs you'd report them for cruelty & they would be prosecuted. There's obviously something very wrong; only an extremely hungry & desperate dingo attacks a person. Please don't wait until it's too late. The dingoes need help to survive.
1,381. Jennifer Jamieson	Katoomba, Australia	
1,382. Andrea Stringer	Bagshot, Australia	Ban the general public & motor vehicles from Fraser Island. Make it a dingo sanctuary & release some prey for the dingos to hunt so they're not starving.
1,383. vanessa Mignon	sydney, Australia	This is upsetting
1,384. Dianne Whalley	Melbourne, Australia	
1,385. Tina Maria	Perth, Australia	
1,386. Guy Jamieson	Katoomba, Australia	
1,387. Joseph Gould	Vermont, Australia	
1,388. Bob Seymour	Hallett Cove, Australia	keep the tourists away from the dingoes (fences!!) and feed the dingoes inside the fences. ie make Fraser Island a big free-range zoo. No more taging or starving dingoes and no more tourists putting themselves in danger.
1,389. Carleen Birse	Smythesdale, Australia	
1,390. Glenys Parslow	East Geelong, Australia	Your treatment of these beautiful native animals is shameful. How can you sanction starving these creatures to death? If I treated my own dogs in this way I would be prosecuted for animal cruelty. The dingoes future should be placed in the hands of the local indigenous people. Time is running out - please act swiftly.
1,391. Miles Howe	Norfolk Island, Norfolk Island	I have been really disturbed to read and see about the fate of Fraser Island's dingoes. Shame shame shame on the Qld national Park Service.
1,392. Iain Williams	Brisbane, Australia	
1,393. libby malkova	minto, Australia	Thank You Jennifer for having compation and bringing this to our attention. The situation is disgraceful!!! Why not let taditional owners take over Frazer Island like they did Uluru ans Kata Tjuta? They understand this country better than Parks and Wildlife.
1,394. Caroline Grigor	Fernleigh, Australia	I am repulsed and deeply disturbed that as a supposedly 'advanced' and 'forward thinking' nation, we are permitting this attrocity to happen before our very eyes. Do something NOW to save this species before (like so many others) it is too late. We treated the indigenous people of this land apallingly, and now in this day and age we are treating the animals of this land inhumanely.

Name	From	Comments
1,395. Debra Brown	Malvern, Australia	I cannot believe this is happening in Australia. No wonder these dogs are attacking humans - they're starving! Immediate action needs to be taken... We must supplement feed these dogs or introduce a new food source. To simply sit back and allow this to happen is not the Australian way. I saw dogs in this condition in several third world countries and it's a shockingly slow and cruel death. Shame on the people who should be protecting these dogs.
1,396. ann brown	glen innes, Australia	drop road kills on Fraser Island and dead goat carcasses to feed the dingoes.
1,397. gail buckley	albion park rail, Australia	Feed the bloody animals
1,398. debbie duncan	Nambucca Heads, Australia	
1,399. Chaya McDonald	Forest Lake, Australia	I am 11 years old and would love to grow up and work with dingos to help save them. I would love to go to Fraser Island to see them with you and my mum.
1,400. Emma Loew	Cairns, Australia	t people who r supposed to be protecting these dingoes should be prosecuted. govt needs to research why starvation is occurring in t first place, get t facts then get results.
1,401. HELEN HENDERSON	Tumbi Umbi, Australia	I certainly will visit, and I will take all my visitors from overseas to Frazer Island only when the Dingoes are in good condition. The only solution is to feed them OR LET THE INDIGENOUS BUTCHULLA PEOPLE TO LOOK AFTER THEM. It will take a long time for Frazer Island tourism to recover, after this international disgrace. To let the Dingoes starve to death, and procecuted a kind lady for feeding them. I am ashamed to be an Australian.
1,402. Christine McPherson	Morayfield, Australia	
1,403. Lenise Morais	Sydney, Australia	
1,404. Patricia Mackaway	Holland Park, Australia	The starvation of any animal is a criminal act. Ironically I have had a 'rescue greyhound' who was seized by the RSPCA 2 years ago and her owners charged with not feeding her - she had lost over 10kgs. Prior to that we had a dingo cross german shepherd - the most wonderful dog in the world. It is imperative that the Fraser Island dingoes be cared for, as is the law with all domestic breeds. I have often wondered why dingoes aren't promoted as a legitimate domestic dog. They make wonderful pets. Best of luck with this endeavour.

Name	From	Comments
1,405. MYRIAM BESSO	Mosman, Australia	Vive les dingoes, and who cares if they are a "native" species - no HUMANE person on earth would let a unique species like our Dingoes, die from lack of food, when we have an abundance in our country.
1,406. Julianne Brown	Urangan, Australia	The dingos were there first. We took away their food source. Now WE should replace it. As usual, its all about money. Tourism and money. I am discusted. I have much respect for Jennifer. I cant say that about anyone else involved.
1,407. ian hunter	bowral, Australia	
1,408. Kathryn Saunders	Tarlee, Australia	Why is it that we treat our native animals with disrespect? I am sickened and ashamed to call myself an Australian..
1,409. Tess Corbel	Brisbane, Australia	I am ashamed to live in a country that puts tourism ahead of the protection of native species. For too long the dingo has been demonised and portrayed as a savage predator. I hope that the Government has the guts to sit down and have productive talks with those on the side of the Fraser Island dingos, including the Indigenous population, and to stop treating those who want to protect them like criminals. We MUST find a solution to this problem.
1,410. Linda Roling	Salisbury, Australia	
1,411. Byron Guthrie	Bacchus Marsh, Australia	After viewing Australian Story I felt disgusted by the attitude of human beings, in particular the Rangers of Fraser Island. These are Government officials allowing our native dingoes to starve to death. Instead of prosecuting a dedicated dingo supporter, the Government and the Rangers should be acting to ensure the health and survival of these beautiful, pure native animals.
1,412. Erin Sonogo	Warrnambool, Australia	If only the bureaucrats at QNPS were as comitted towards productive activities as they are towards the persecution of one individual... The ruthless treatment of the dingo must stop. A coexistence strategy is required without delay.
1,413. Emily Shevchenko	Geelong, Australia	
1,414. Marlene Muir	hampton east, Australia	
1,415. Vicky Stewart	Brisbane, Australia	
1,416. Patricia Lazenby	Perth WA, Australia	Shame Shame Shame Queensland Government. You should be charged with animal cruelty. These poor animals are starving, if that was my dog I'd have the RSPCA taking me to court. Someone needs to feed these poor animals.
1,417. carol faust	collbran, CO	just love all animals god made them for a reson!!
1,418. Gillian Taylor	Willoughy, Australia	
1,419. Luke Peterson	Doncaster East, Australia	

Name	From	Comments
1,420. Jean Gundry	TOOWOOMBA, Australia	
1,421. Andrew Cole	North Bondi, Australia	
1,422. Cjay McKenzie	Maudsland, Australia	
1,423. michael ezersky	bundaberg, Australia	Help us tell the queensland government that you want all our animals still here, when you visit oneday!
1,424. Michael Kelly	Adamstown, Australia	The dingoes on Fraser Island should be protected and treasured, not driven to starvation and extinction. This is a scandalous situation.
1,425. Narelle Nicolson	sydney, Australia	
1,426. Margaret Briley	Urangan, Australia	
1,427. Diana Tomkins	Taringa, Australia	I was appalled yet again (firstly by the shooting of these iconic species a few years ago) and more recently by seeing them starving and in such poor condition. They should not be destroyed due to isolated events. Feeding stations well away from any public areas should be set up (and the ban on the public feeding them remain strictly in force). The local indigenous people should also be the ones to look after them as obviously QP&W Rangers are incapable and should be prosecuted for their actions and inactions. Additionally, 4WD vehicles should be banned from the island and the numbers of tourists/vistors greatly restricted. Our precious wildlife should have some areas where the can be left alone without harassment and persecution by humans.
1,428. Janet Moyle	Richmond, Australia	What has happened to humanity in Queensland? The treatment of the dingoes amounts to torture and cannot, must not , be allowed to continue. Put a line under it, sack the cowboys and organise proper management NOW.
1,429. Sally MacKinnon	Beechmont, Australia	I am aware that there are many complexities within nature conservation, particularly where creatures like dingoes and tourists are concerned. I also know there are a number of QPWS staff and civil society players, particularly including the indigenous people of Fraser Island, who have the capacity to work with such complexity in ethical and humane ways. Surely we can bring this diversity of people together to courageously and wisely design real solutions that solve for pattern - for the health of our interconnecting ecological and social systems??

1,524. Tommy McBride	Beechboro, Australia	Please help the Dingoes
1,525. Craig Elmgren	Calgary, Canada	
1,526. Lu Smith	Moina, Australia	
1,527. Felicity Aldrich	Katoomba, Australia	The Dingoes of Fraser Island today are the Tasmanian Tiger of yesterday, suffering to extinction because of the stupidity of the humans supposed to protect them. Humans are the worst predator. No brain (unthinking humans) plus too much armour (laws and weapons) equals extinct. This not only applies to the Dingo, we are actually doing it to ourselves. Humans don't deserve to survive their own stupidity. Help the Dingo regain some lost ground and then leave the Dingo alone. That stupid people can allow this extinction to happen is bad enough, but that egotistical, one-eyed humans can actually bring it about is sad beyond words and entirely unforgiveable. Is the extinction of a species a reasonable price for the death of one child? I DON'T THINK SO.
1,528. val hoffman	maleny, Australia	
1,529. Georgina Palmer	Shailer Park, Australia	There must be a better way to humanely manage the Fraser Island Dingo population. The island is an important place for Australia and the dingoes are a part of that importance.
1,530. Helen Michaelsen	Jarrahdale, Australia

1,608. Roz Holme	cessnock, Australia	
1,609. Flavia Quintella	sao Paulo, Brazil	
1,610. Greg Carey	Hervey Bay Qld, Australia	Disracefull treatment of these animals, they have never been treated the right way - these office dwellers think they know all there is to know about them - they are so far off the mark. The animals are starving i have seen how they scavenge for food first hand and its not a pretty sight - so there answer is not to feed them so the dogs get to starvation point and bite somene and they SHOOT them - mindless !!!!
1,611. Lorraine Martret	Melbourne Victoria, Australia	
1,612. Lynda Staker	Mackay, Australia	
1,613. Johanna Horvath	Melbourne, Australia	We have already brought the tasmanian tiger into extinction - an obvious regret from our government. Why must we slaughter another?? The island is THEIR territory. Protect them and leave them be!!! The government is being cruel and inhumane and TARNISHING their reputation for the whole world to see. Pick up your game. STOP the murder of these beautiful creatures.
1,614. anne bateman	Narrogin, Australia	we wouldnt allow our pets to starve to death so why sit back allow the Fraser island Dingos die?
1,615. juliana vasconcellos	São Paulo, Brazil	
1,616. Helen Bergen	Bathurst, Australia	The last pure-bred population of dingos in existence is being shot by the Queensland government. Please help Australians stop this,
1,617. Pamela Fairman	Safety Bay, Australia	How can we stand by and let this happen, What is wrong with us? - what is wrong with those that have the power to help or to stop this? We do not have many wild animals in Australia but what we have are supremely unique - don't let this happen. How can anyone sit by and allow a selfish Bureaucratic Queensland Government have the control of this - this is an Australian animal (an animal of the world)not a Queensland one. STOP THIS! get the humans out, make some space, find a better way to co-exist don't kill anymore native creatures!!!
1,618. Ben Martin	perth, Australia	Makes me sick.

1,639. Oriana Licul-Milevoj	Woodend, Australia	How can we allow the beautiful Dingo to suffer in such away. We should appreciate the animal and be proud of it, just as we are proud of the Emu, Koala and Kangaroo! Ignorance is our biggest enemy, The key is education. The Dingo is intelligent, sensitive, very loyal and a gentle creature by nature, not aggressive. I know, I can say this, because, I have one. Any animal, even us humans will do anything for food. Its the Dingo's basic right to eat. It our responsibility to allow for that.

1,811. Deanna Baker	Milton Freewter, OR	
1,812. Heather Fardy	Port Douglas, Australia	
1,813. Kaye Kelly	Urraween, Australia	I cant imagine just why the powers that be have not woken up to the fact that these dogs are starving!!!...that is why they are attacking...In past times fishermen used to clean and gut their catch on a particular part of the island and this is where the dogs used to forage for food as all the natural food sources the are supposed to eat have long since been redundant. Recently, the local Fraser Coast Council have stopped the fishermen from doing this and as a results these dogs have no other food source. WAKE UP THESE ANIMALS ARE STARVING...THEY HAVE NO FOOD!!! Dont shoot them because they are hungry!!!
1,814. Hayley Davis	Maryborough, Australia	The Dingo's on Fraser Island have more rights to be there then we do !! The should be trying to save them not get rid of them.
1,815. Ruth Macklin	Boyne island, Australia	
1,816. heather staples	toogoom, Australia	
1,817. Bernie Ryman	Pialba, Australia	How many more dingoes will have to be killed before this pure breed on the island is finally extinct - get your stuff together you dummies & do something worthwhile for a change, and save this species before its too late
1,818. Kylie Palmer	Hervey Bay, Australia	
1,819. Lori Hadley	Mountain Home, AR	As a tourist I would much rather take my chances on encountering a wild Dingo then know that they are enclosed and STARVING because I want to visit their home island. Until there is some type of positive new management for these poor Dingoes I will NOT be coming there & neither will my family or my friends here in the US and in Europe! I intend to tell EVERYONE about the DEPLORABLE conditions & treatment of these Dingoes on their very own island!!!
1,820. Serenity Welch	Arundel, Australia	
1,821. Bronwyn Britten	Maryborough, Australia	Cruelty to animals is not acceptable, and there are NO EXCUSES!!

1,868. Jay Brukmann	Beerwah, Australia	Shameful!
1,869. Matt Clayton	Mundoolun, Australia	Here's an idea: don't camp on Fraser Island, then you won't have to fear wild animals. You can't blame an animal for not caring if you live or die. They don't seek revenge so neither should we.
1,870. jess moses	logan Village, Australia	
1,871. Sam Irwin	Jimboomba, Australia	Its not fair, they don't deserve to be killed because humans invaded their land. It was theirs first and humans decided we wanted it and now they can live there. Its selfish and cruel.
1,872. Amie booth	vic point, Australia	That need to be respected and treated right they are an icon of fraser island and an icon of australia and most of all a living and breathing animal. maybe a feeding program would solve this problem.
1,873. Rikki Fanning	Adelaide, Australia	
1,874. Barry Tucker	Narooma, Australia	
1,875. Mikaela Kropp	Brisbane, Australia	
1,876. Shantel Wyllie	Camira, Australia	Save the Dingo's!!! Fraser island holidays as a child would just never have been the same without them, help save them for future generations!!!
1,877. Glenys Dennis	Jimboomba, Australia	I am horrified at the narrow-minded view being taken with regards to the Fraser Island Dingoes. We cannot stand quietly by and watch yet another species, especially one so unique, become extinct. The problems with human and dingo interaction on Fraser Island are not the cause of the dingo, but, are caused and are the responsibility of humans. Instead of focusing on the tourist industry on the island we need to limit the tourist numbers permitted on such an environmentally important area. It is too late once the dingoes are gone! Surely liason with Australia's Dingo Breeding Programme would be beneficial in protecting this dingo strain.

Name	From	Comments
1,878. Menkit Prince	Uki, Australia	Only 50 dingoes left and they are original inhabitants there. So starving they are eating shells, sand and grass all because our Qld government does not want them there - as a tourist please write to our government and tell them you refuse to travel there until they are allowed to be fed, as the aborigines always used to. This is pitiful and shameful of the authorities to bring this situation about.

2,125. Annie Cowling	Danbury, CT	
2,126. Pauline White	Mittagong, Australia	I've visited Fraser Island several times in the past and one of the reasons is it's beauty in ecology and the fauna, especially the dingoes. To tag and collar as is being done at present is a disgrace. The state of these animals is quite alarming. Could they be cared for by dropping food (obviously away from tourists) also educate the tourists as they would be in the African National Parks eg. remember they are native wild animals! To lose this only species of pure dingo would be an absolute disgrace and very short sighted for the tourist dollar. Sincerely Pauline White and Richard Bramham

2,254. brenda heaton	skipon, United Kingdom	save the dingos
2,255. Julie Hulme	Tweed Heads, Australia	Surely as Guardians of our Planet we wish to preserve every species, and provide that they live with dignity and worth. This situation is disgraceful....having eliminated the dingo's natural sources of food, we leave them to starve? You want tourism dollars?.... Dingos are a huge part of the Australian psyche, as well as the Aboriginal Dreaming. One of the reasons people visit Fraser Island is to actually see dingos in the wild. Give them their worth. At the very least set up a feeding programme or provide a food source that these animals can access.
2,256. Vanessa Talbot	Orange, Australia	Having visited Fraser Island, the thing that gave me the most joy was seeing one of the dingos on the beach. I still remember those moments clearly today, with the sky of purples and pinks from a setting sun behind the emblazed gold of the dingo's coat as he trotted along the beach. Beautiful. A memory to be treasured and that everyone else should have the right to see and experience.

2,282. Juanita Kammholz	Gatton Qld, Australia	The management program for the Fraser Island Dingo is atrocious. When I was young and growing up on Fraser Island the Dingoes weren't a problem. Now they are, so, my question is this. If they weren't a problem BEFORE this management program and are a problem AFTER then it's completely logical and common sense that the management program is not only not working but needs to be desperately reviewed and changed. For goodness sake someone have the courage to do something before the only pure strain of dingo is gone forever. Then yet another species will be extinct and all because of humans. Disgusting.
2,283. becky wallendal	carrollton, TX	The humans brought them there ... so take care of them!
2,284. Melanie Raggam	Hervey Bay, Australia	I live locally, next to Faser Island..The Dingo's need saving, tourists need educating,
2,285. Theresa Taylor	Dudley, Australia	These are beautiful creatures . It is disgraceful that they are not highly protected. I spent a week on Fraser island in 2003 & seeing the dingoes was the highlight but it was sad to see them so thin. Please protect them before it is too late .

2,346. Lisa Taylor	Gympie, Australia	<p>I remember when the dingoes, brumbies and tourists all lived in harmony on the island.. a healthy abundant system. It would seem apparent to me that human intervention has created a dire situation for the dingoes whom battle for food source deprived from in my opinion culling of Brumbies and fueled by available substitution of a food source coming from human food supplies carried over there. I come from experiencing Fraser in the early 80s when there were much less people on the island and over the years it is obvious to me that a lack of care has been taken to manage/ minimise the amount of people on the island at one time. This has created an imbalance between human occupation and the natural and very delicate system which continues to reside on the island of which we are privileged to have at our door step. Perhaps it takes a certain understanding on both parts to coexist and a recognition of something special well worth preserving for future generations. Not for profit, to come to a meeting of minds on this matter. Environmental impact constituted from humans should be further assessed. The natural system to be recognised as a self regulating rather than one that is devised from legal management only. The facts speak for themselves and each has a valid point but does extreme reaction from fear ever result in a long term positive sustainable outcome? Ridiculous defensive behavior and ignorance resides here understandably considering the tragic events that have occurred as a result of an imbalance created from overuse and human occupation.. something has to give.. and suffering is no answer.. minimise the human impact and allow the system <i>(continues on next page)</i></p>

2,373. Elise Martinson	Kew, Australia	I have been to Fraser Island and was unaware of this horrendous act of unsustainable cruelty at the time. QLD is clearly trying to protect its tourism income, but where will the tourism be when the dingoes are gone? Just idiotic. Ban the fools who bring small children and leave them unattended to wander around if a dingo didn't eat them they probably would have drown anyway. Careless parenting isn't the fault of the starving dingoes.

2,379. Trent Lane	Boronia, Australia	Save the Dingo! Its time to Act!
2,380. Megan Yarrow	Gold Coast, Australia	
2,381. Emma Tait	Miami, Australia	K'gari (Fraser Island) is a World Heritage Listed site of environmental and cultural significance. The Fraser Island Dingos are biologically unique and their extinction due to mismanagement, greed and ignorance would be nothing short a crime. Sustainably-practiced Tourism generates long-term economic benefits to Australia through protecting and managing the environment. Obviously, the existing culture and practices within Dept. Environment and Resource Mgmt. needs to progress to one that reflects the value of Fraser Island's natural and cultural resources and the conscious attitude of Australian's and tourists alike. Please read Jennifer Parkhurst's story and learn about the amazing Fraser Island Dingo, it is a fascinating story of love and survival. Thank you.

2,384. Judi Meloni	Tewantin, Australia	
2,385. Ronick Sequeira	Brisbane, Australia	Dingo are one of the most oldest breeds of wild dogs and if you could do anything to create a small sanctuary for the animals it would be awesome
2,386. Danuta Watola	Kalety, Poland	
2,387. Erin Wallace	Gilston, Australia	The mismanagement of such an iconic species is appalling - especially in this day and age. Why are these people using archaic tracking methods that are unsuitable to dingos? The only reason I would visit Fraser would be to see these animals. Exterminating them via mismanagement - not on people.

2,393. Cynthia Clements	Triabunna, Australia	
2,394. Kylie Anderson	Tewantin, Australia	Fraser Island is an incredibly special place - due in part to the occupancy of these beautiful animals... We must save The Dingo before extinction when it is all too late and then we wonder how things went wrong...
2,395. Ursula Beaton	Wilson, Australia	
2,396. J Smail	Hervey Bay, Australia	People need to be aware that THEY are the visitors to the dingoes home, not the other way around.
2,397. Pauline Starkey	Wilson Perth, Australia	
2,398. Jenny Edman	Leeming, Australia	Fraser Is would lose over half its appeal without the free roaming dingoes. It is up to visitors to take care of themselves and respect the dingo territory.

2,407. sheila cousins	perth, Australia	i would not visit anywhere that I knew the govt. of the day would enable the extinction of an iconic species
2,408. Margaret McMahon	Mundaring, Australia	This is our iconic dingo and is the only Australian animal that is not protected. It is TIME for this issue to be addressed and protection offered to these wonderful animals.
2,409. jackie spindler	stoneville, Australia	
2,410. Linda Shone	Morley, Australia	
2,411. Barbara Booth	South Perth, Australia	How many other beautiful Australian icons are you going to 'exterminate' ? If you intrude on an animal's habitat, particularly one that has every right to be there and has been for longer than you've been alive, you are destroying the future for your children and grandchildren/ Would you like somebody to come into your property and destroy it? How can you hold the position you do with no integrity?
2,412. Ted PENNINGTON	MANDURAH, Australia	Dingoes should be protected not exterminated. State authorities should manage the Public in these areas and educate them in how to live/visit areas where wild animals live. I have worked with Dingoes for six years and neither I or my colleagues were ever attacked by the Dingoes. EDUCATE THE PUBLIC & GOVERNMENT EMPLOYEES AT FRASER ISLAND.
